

Drive safely this hurricane season with our TOP TIPS TO KEEP YOUR VEHICLE SAFE & READY.

Lake Sumter Transmissions & Auto Repair and Lake Sumter Auto Repair

have always had one mission, to help you keep your vehicle safely on the road with reliable repairs and maintenance. As lifelong Floridians we have weathered many hurricanes through the years and are happy to provide some helpful tips to assist you in your preparations.

- **FULL TANK OF GAS:**

Keep your gas tank full. Fuel shortages can occur during and after a storm, so having a full tank ensures your peace of mind and don't let it get below a ¼ tank

- **INSPECT TIRES:**

Make sure your tires are properly inflated and have adequate tread. Good tires can help you navigate wet roads safely. Flooded roads happen, turn around!

- **FLUID LEVELS:**

Check your oil, coolant, and windshield wiper fluid levels. Having clean fluids can improve your vehicle's performance during tough conditions.

- **WIPER BLADES:**

Replace old wiper blades to maintain visibility during heavy rain. Clear vision is crucial in stormy weather.

- **CHECK YOUR BATTERY:**

Ensure your battery is fully charged and in good condition. A weak battery can leave you stranded.

- **HEADLIGHTS / TAILLIGHTS:**

Make sure that your headlights and taillights are operational and lenses are clear and bright. Other motorists can see you and you can see the road.

- **STAY INFORMED:**

Keep up with local weather reports and alerts. Knowing the storm's path can help you make timely decisions.

As a family-owned business for over 45 years we will be here before, during and after the storm. We are happy to serve you at either of our locations to find the best solutions to keeping your vehicle safely on the road! **STAY SAFE!**
